DETAILED ACTION

1. Claims submitted on document filed Oct. 23, 2006 has been entered. The claims was amended by the applicant on September 1, 2006 which were not considered in office action dated September 7, 2006. Currently claims 1-37, 39 and 41-42 are present in the instant application.

Reasons for allowance

2. The following is an examiner's statement of reasons for allowance: Applicant's amendments to independent claims 1 and 16 have further distinguished the invention over both Kar and Hoffman. Kar teaches utilizing a single abrasive media for its cascading operation, and thus when in low energy pass through as well as high energy processing, the same abrasive media is used by Kar. With respect to Hoffman, Hoffman fails to teach the combination of a low energy and high energy cascading operation since Hoffman is directed to the performance of two high energy cascading operations (col. 4, lines 53-54) and utilizes media in each of its high energy processes which includes an abrasive. Applicants claim the use of different media (a low-energy processing media and a high-energy processing media) for the low energy and high energy cascading operations, respectively, where the low-energy processing media includes an abrasive and high-energy processing media does not include an abrasive. As for claim 28, the prior art fails to teach or make obvious the utilization of the low-energy processing media consists essentially of a cutting abrasive and water while the different high-energy processing media consists essentially of a detergent and water.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
